

NADER MNEJLI

Software Engineer | .NET & Angular Full-Stack Developer

Ariana, Tunisia | +216 96 605 573 | nadermnejli77@gmail.com | linkedin.com/in/nader-mnejli | github.com/nadermnejli

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience designing, building, and deploying enterprise-grade web applications using ASP.NET Core and Angular. Proven track record delivering scalable REST APIs, microservice-ready architectures, and healthcare software platforms within Clean Architecture and Agile/Scrum environments. Hands-on expertise across SQL Server, Docker, and CI/CD pipelines (GitLab, Azure DevOps). Recently extended focus into AI-integrated systems, combining backend engineering with large language model APIs (Groq/Llama 3.1) and OCR data-extraction pipelines. Known for writing clean, maintainable, well-tested code and delivering production-ready software on schedule. Seeking to bring strong problem-solving skills and full-stack ownership to a software engineering team in Germany.

TECHNICAL SKILLS

Programming Languages: C#, C, C++, JavaScript, TypeScript, PHP, Dart, Java, SQL, XML

Backend Development: .NET, ASP.NET Core, Entity Framework Core, Dapper, Node.js, REST API Design

Frontend & Web: Angular, Razor, Blazor, .NET MAUI, HTML5, CSS3

Mobile Development: Flutter (Dart)

Databases: SQL Server, PostgreSQL, MySQL, Oracle

DevOps & Cloud: Docker, Kubernetes, Git, GitLab CI/CD, Azure DevOps, AWS

Architecture & Practices: Clean Architecture, SOLID Principles, Repository Pattern, Microservices, Agile/Scrum

AI & Emerging Tech: LLM API Integration (Groq/Llama 3.1), OCR Pipelines (Tesseract, PdfPig), SignalR Real-Time Systems

Languages: English (Professional Working Proficiency), French (Professional Working Proficiency), Arabic (Native)

PROFESSIONAL EXPERIENCE

Full-Stack .NET Developer — Jisemix

2024 – Present

Tunisia

Project: MediAlerte — Healthcare Platform

- Developed a platform for managing unscheduled healthcare services, connecting patients with available medical support in real time.
- Designed and built REST APIs for patient management and alert/notification systems.
- Integrated the platform with external national healthcare systems for secure data exchange.
- Improved query and API response performance by migrating data access to Dapper.

Technologies: Angular, .NET Core, SQL Server, Dapper, Docker, GitLab CI/CD | **Methodology:** Scrum

Project: Medipil — Medical Appointment Management System

- Designed and developed a medical appointment management system end-to-end, from requirements gathering through deployment.
- Implemented core backend business logic and API endpoints supporting appointment scheduling workflows.
- Improved system performance and scalability through query optimization and caching strategies.

Technologies: Angular, .NET Core, SQL Server, Dapper, Docker, GitLab CI/CD | **Methodology:** Scrum

Final Year Project — Nutreeto: AI-Powered Nutrition Platform

Jan 2026 – Jun 2026

Jisemix | Ariana, Tunisia

- Designed and built a full-stack AI-powered nutrition management platform connecting nutritionists and patients through web and mobile applications.
- Developed a secure ASP.NET Core backend using Clean Architecture, JWT authentication, and Entity Framework Core, paired with an Angular dashboard and a Flutter mobile app.
- Integrated the Groq Llama 3.1 API to auto-generate personalized meal plans and clinical reports, reducing manual reporting effort for nutritionists.
- Built an OCR pipeline (Tesseract, PdfPig) to automatically extract structured data from medical reports.
- Implemented real-time messaging and a smart notification system using SignalR for clinical reminders.
- Delivered a scalable, fully containerized solution with Docker, following Scrum methodology.

Technologies: .NET 9, ASP.NET Core, C#, Angular 16, Flutter, Entity Framework Core, MySQL, SignalR, JWT, Docker, Groq API (Llama 3.1), Tesseract OCR, PdfPig, Clean Architecture, PrimeNG, GetX

Full-Stack Developer — FoodMe: Restaurant Comparison Platform

Dyno & Motiva Systemes | Ariana, Tunisia

Designed and developed a full-stack web application using ASP.NET Core and Angular.

Built REST APIs for restaurant and menu management.

Optimized PostgreSQL queries to improve application response time.

Applied Clean Architecture principles and implemented a responsive, authenticated user interface.

Technologies: Angular, .NET Core, PostgreSQL | Methodology: Scrum

Jul 2023 – Jan 2024

End-of-Study Project — Mobile Ticketing Application

Dyno & Motiva Systemes | Ariana, Tunisia

Designed and developed a mobile application for the digitalization of restaurant meal vouchers.

Technologies: Flutter, .NET Core, PostgreSQL, Figma | Methodology: Scrum

Feb 2023 – Jun 2023

PI-DEV Integration Project — Online Recruitment Platform

ISET Beja | Beja, Tunisia

Designed and developed a web and mobile recruitment platform connecting employers and candidates.

Technologies: Android, Angular, Spring Boot, MySQL | Methodology: Scrum

Oct 2022 – Jan 2023

INTERNSHIPS

Advanced Training Internship — Tunisie Telecom

Beja, Tunisia

Designed and developed an e-learning web platform.

Technologies: Angular, Spring Boot, MySQL

Jan 2022 – Feb 2022

Initiation Internship — Tunisie Telecom

Beja, Tunisia

Developed a web application for SIM card management and an online sales platform.

Technologies: HTML5, CSS3, JavaScript, Bootstrap, PHP, MySQL

Jan 2021 – Feb 2021

EDUCATION

Software Engineering — Engineering Degree

Tek-Up University, Ariana, Tunisia

2023 – 2026

Bachelor's Degree in Information Technology

Higher Institute of Technological Studies, Beja, Tunisia

2020 – 2023

High School Diploma in Computer Science

Ali Balhawen High School, Beja, Tunisia

2019 – 2020

INTERESTS

Football, Photography, Piano, Video Editing
